

The Texas Crypto Map: Geographic Strategy

3-Region Territory Consolidation

Generated by Gemini

December 2025

Executive Summary

This report consolidates the entire state of Texas into three (3) primary sales territories. This structure uses the "Texas Triangle" metros (Dallas, Austin, Houston) as regional anchors, ensuring that every outlying area (West Texas, Panhandle, RGV) is logically assigned to a major hub for efficient coverage.

Contents

1	Region 1: North & West Texas (The DFW Hub)	1
2	Region 2: Central & South Texas (The Austin Hub)	2
3	Region 3: Gulf Coast & East Texas (The Houston Hub)	2
4	Consolidated Geographic Map	4

Region 1: North & West Texas (The DFW Hub)

Anchor City: Dallas-Fort Worth Metroplex. **Attached Territories:** The Panhandle (Amarillo/Lubbock) & West Texas (Permian Basin/Midland/Odessa).

The Geographic Logic

DFW serves as the logistical and financial gateway to the vast plains of Northern and Western Texas. Corporate headquarters for mining operations in the Permian Basin are often located in Plano, Irving, or Dallas proper.

Key Segments Covered

- **Corporate Mining (DFW):** Publicly traded miners (Riot, Cipher) and large-scale infrastructure funds.
- **Wind Energy (Panhandle):** Renewable energy farms in Amarillo/Lubbock using crypto for curtailment.
- **Oil Field Ops (West TX):** Remote mining sites in Midland/Odessa utilizing flare gas.

Sales Strategy

"The Industrial Corridor." This is a heavy B2B territory.

- **Pitch:** Enterprise scale, regulatory compliance, and grid stabilization.
- **Best For:** Selling insurance, large-scale cooling infrastructure, and legal services.

Region 2: Central & South Texas (The Austin Hub)

Anchor City: Austin. **Attached Territories:** San Antonio, The Hill Country (Rockdale), & The Rio Grande Valley (McAllen/Brownsville).

The Geographic Logic

The "I-35 Corridor" connects the tech center of Austin directly to the trade hubs of the southern border. This vertical slice combines the "brains" of the industry (Austin devs) with the "users" (RGV retail payments).

Key Segments Covered

- **Tech & Innovation (Austin):** Protocol developers, VCs, and software startups.
- **Industrial Mining (Rockdale):** Massive sites (Bitdeer/Whinstone) located just 1 hour east of Austin.
- **Payments & Retail (Rio Grande Valley):** High adoption of crypto ATMs and stablecoins for cross-border trade.

Sales Strategy

"The Innovation Vertical." A mix of high-tech software sales and retail technology.

- **Pitch:** Innovation, community building, and real-world payment utility.
- **Best For:** Dev tools, recruiting, POS systems, and ATM placements.

Region 3: Gulf Coast & East Texas (The Houston Hub)

Anchor City: Houston. **Attached Territories:** Galveston, Beaumont, The Woodlands, & College Station.

The Geographic Logic

Houston dominates the Texas coast. This region is defined by the energy sector (Oil & Gas majors), global logistics (Port of Houston), and academic research (Texas A&M in College Station).

Key Segments Covered

- **Energy Trading (Houston):** Power brokers and O&G executives integrating mining for load balancing.
- **Supply Chain (Ports):** Logistics firms exploring blockchain for shipping transparency.
- **Research (College Station):** Academic conferences and engineering talent coming out of Texas A&M.

Sales Strategy

"The Energy Coast." Focus on commodities and grid integration.

- **Pitch:** Asset monetization, ROI on wasted energy, and supply chain efficiency.
- **Best For:** Energy consulting, modular data centers, and specialized engineering firms.

Consolidated Geographic Map

Region Anchor	Geography Included	Key Industries		Primary Pitch
1. Dallas (North)	DFW, Panhandle, West Texas	Corp Mining, Wind, Oil	Field Ops	Scale & Stability
2. Austin (Central)	Austin, San Antonio, RGV, Rockdale	Software, Startups	Payments,	Innovation & Retail
3. Houston (Coast)	Houston, Coast, East Texas	Energy, Trading	Logistics,	Asset Monetization
